

TECH RIDER

(323)632-6735 SCOT@JUGGLEGOOD.COM

Microphone: Scot will bring his own Sennheiser wireless mic with headset and lav. It has an XLR or 1/4" output and is completely battery power'd.

Music: There are prerecorded songs in the show. A soundman will need to be on-hand to play songs and will need either cd player or ipod input.

Output: Will need a simple mixer and adequate speakers for entire audience to hear Scot's words. There is bunches of verbal comedy.

Note: Sound pros are best to use when setting up a system. DJs are not always qualified to create a flawless wireless mic experience.

LIGHTS

Priority 1: lighting for visibility.

Priority 2: lighting for audience focus (dark over audience, bright on stage w/ followspot if possible).

Priority 3: making juggling easier (Even lighting with side/ back or footlights can help out a lot).

OR

For added expense, Scot can provide his own lighting. He will need nearby electric power plugs with high wattage output.

OR

For added expense, Scot can provide his own sound support. An assistant will help him. He will need nearby electrical outlets and a hug.

SCOT IS NOT A DIVA!
Scot can make good entertainment under lots of circumstances. He is glad to compromise to make sure everyone's happy.

STAGE

Basic: 10' ceiling, 6" raised stage, 5' x 5' stage space, close to audience, small table for props (or hard-seat chair or stool)

Deluxe: 20' ceiling, 2' raised stage, 30'x30' stage space

DRESSING ROOM
